@TENNA

- Accurate and modern design combined with COBO experience in a new steering column system.
- Tilt movements are independent and constant adjustable by direct actuation of gas springs with rigid lock up to 30° of adjustment each one towards drivers.
- Wide range of telescopic adjustment of 90 mm by side retractable lever.
- Modular covers (plastic injection) customizable in different colors and “surfaces studs free” style for a better integration in the increasingly attractive vehicle workplace.
- Flexibility and modularity for different needs: just selecting different upper covers it is possible to arrange versions with the main controls on board or narrow design for optimal working area visibility.

@TENNA Slim
